The organization of Montegrappa Trophy 2022 will provide a Live Tracking Device (LTD: device for real time tracking) to all pilots. It must be used in each task to increase safety, achieve significant media impact and improve the retrieve service.

The devices will be also used as primary source for scoring.

The organization will be responsible for charging all LTDs and delivering them to the pilots each flying day. Pilots must ensure to have their own LTD before take-off: failing to pick it up or returning it to the organization before the beginning of the task will be interpreted as the pilot's refusal to accept the task. The pilot that for whatever reason won't fly the assigned task has to return the LTD to the organization directly at the take-off before the window opening time.

After receiving the LTD, pilots will be responsible for its proper use and maintenance, making sure that it is turned on during the flight and returning it to the organization at the end of each task (report back). Instructions on the use of the devices will be given during the briefing.

In case of loss or damage of the LTD, pilots will be requested to pay the full compensation of damages, amounting to € 250.00.
